THE TECHNOLOGICAL FUTURE FROM 1970

Since 1970 Montenero has been the reference point for woodworking tools production and its derivatives both for Italy and overseas.

The state-of-the-art technology driven by the precious experience of our technicians, let Montenero produce thousands of standard and customised tools each year. These are made in PCD (polycrystalline diamond) or HW (hard metal), with mechanical inserts or HW integral able to satisfy the most specific requests.

MONTENERO CUSTOMER SATISFACTION

Montenero stands out of the crowd for its capacity, flexibility and efficiency for reaching innovative, standard and customised solutions.

Every idea is achieved by our technicians thanks to the latest 3D projection software, bringing the final products to life through a productive process integrated with CAD-CAM systems

WHEN PEOPLE MAKE THE DIFFERENCE

Technology is important, however, it is the Montenero technicians whose individual competencies, the training and the experience, supply the best guarantee for our products.

TAILOR MADE & MADE IN ITALY

Our production units realise thousands of standard and special tools every year, we define ourselves as "tailoring" industrialists. We combine the knowledge of field work with the evolution of legislation in order to go beyond software and through the skill of our manpower, we offer the unique quality of Made in Italy.

What sets us apart:

- **Use of the best raw materials, purchased from selected suppliers.**
- **Projects made with latest generation CAD-3D-CAM systems.**
- **Production processes are always progressive.**
- **Constant updating of specialised staff**

QUALITY AS A MISSION

Montenero maintains a high level of quality thanks to the continual updating of the productive process. Each and every tool is produced with the latest machinery and undergoes meticulous checks with cutting edge measuring instruments.
